Approved for the biennium 2016-2017	23	1 D-2, 1 D-1, 2 P-5, 7 P-4, 4 P-3, 3 P-2/1, 5 GS (OL)
Proposed for the biennium 2018-2019	23	1 D-2, 1 D-1, 2 P-5, 7 P-4, 4 P-3, 3 P-2/1, 5 GS (OL)

Overall orientation

6.1 The purpose of the programme is the promotion of international cooperation in the exploration and peaceful uses of outer space for economic, social and scientific development, in particular for the benefit of developing countries. The legislative authority and direction of the programme is drawn from relevant General Assembly resolutions and the decisions of the Committee on the Peaceful Uses of Outer Space, which was established in 1959 by the Assembly in its resolution 1472 A (XIV).

6.2 The main responsibilities carried out by the Office for Outer Space Affairs under the programme are: provision of substantive secretariat services to the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies; implementation of the United Nations Programme on Space Applications (resolutions 2601 A (XXIV) and 37/90); implementation of the programme of the United Nations Platform for Space-based Information for Disaster Management and Emergency Response (UN-SPIDER) (resolution 61/110); discharging of the responsibilities of the Secretary-General under United Nations treaties and principles on outer space and related resolutions (resolutions 1721 B (XVI), 2222 (XXI), 2345 (XXII), 3235 (XXIX), 47/68, 59/115 and 62/101); and coordination of space-related activities within the United Nations system (resolution 3234 (XXIX)). The Office also serves as the executive secretariat of the International Committee on Global Navigation Satellite Systems and its Providers' Forum (resolutions 61/111 and 64/86) and draws additional mandates from other resolutions of the General Assembly, such as on transparency and confidence-building measures in outer space activities (resolutions 68/50, 69/38, 70/53 and 71/42).

6.3 The Programme on Space Applications is mandated to promote greater cooperation and build capacity in space science and technology. The priorities of the Programme include building indigenous capability in the areas of basic space sciences, basic space technology and human space technology and promoting the global navigation satellite system and integrated space technology

Note: The following abbreviations are used in tables and charts: GS (OL), General Service (Other level); NRL, non-reimbursable loan; RB, regular budget; XB, extrabudgetary.

applications in the areas of global health, disaster management, climate change, humanitarian assistance, environmental monitoring and natural resource management.

6.4 The UN-SPIDER programme was established to provide universal access to all types of space-based information and services relevant to disaster management to support the full disaster management cycle. UN-SPIDER serves as a gateway to space-based information for disaster management support, a bridge to connect the disaster management and space communities and a facilitator of capacity-building and institutional strengthening, in particular for developing countries.

6.5 The International Committee on Global Navigation Satellite Systems was established to promote cooperation, as appropriate, on matters of mutual interest related to civil satellite-based positioning, navigation, timing and value added services.

6.6 The General Assembly, through its resolutions under the item entitled "International cooperation in the peaceful uses of outer space", annually guides the work of the programme.

6.7 The Office is also responsible for assisting States in building or enhancing their capacities in space law and policy; strengthening efforts at the national, regional and global levels, including among entities of the United Nations system and international space-related entities, to maximize the benefits of the use of space science and technology and related applications; and promoting and raising awareness of the benefits of space to humankind, particularly through the commemoration of historical milestones and celebrations such as World Space Week and the International Day of Human Space Flight.

6.8 The United Nations Conference on the Exploration and Peaceful Uses of Outer Space (UNISPACE) will celebrate its fiftieth anniversary in 2018. The anniversary Conference, known as UNISPACE+50, is expected to provide further direction and guidance on the work of the programme.

Overview of resources

6.9 The overall resources proposed for the biennium 2018-2019 for the section amount to $7,161,900 before recosting, reflecting a decrease of $60,700 (0.8 percent) compared with the appropriation for 2016-2017. The proposed resource level provides for the full, efficient and effective implementation of the mandate.

6.10 The distribution of resources is reflected in tables 6.3 and 6.4.

Other changes

6.11 Resource changes reflect a net reduction of $60,700 relating to efficiencies that the Office plans to bring about in 2018-2019. The proposed reduction relates mainly to non-post requirements under grants and contributions. The Office will seek to achieve efficiencies through better coordination and arrangement for the travel of participants with a view to maintaining the total number of opportunities in 2018-2019 to enhance their capacities in space science and technology applications, space law and policy, including through extrabudgetary resources.

Extrabudgetary resources

6.12 The Office receives both cash and in-kind contributions, which continue to be vital in the delivery of the mandate of the programme. Projected extrabudgetary resources for the biennium 2018-2019 in the amount of $2,033,900 would complement resources from the regular budget to finance various activities relating to the programme. The increase of extrabudgetary resources amounting to $176,000 reflects the anticipated funding for a new P-4 level post to support the activities of the programme under the Space Applications Section.

6.13 In 2018-2019, the Office expects to receive in-kind contributions of an estimated value of $825,000, which would supplement other activities of the Office necessary to carry out its mandate. Cash and in-kind contributions are also used to provide seed money for activities undertaken as a result of capacity-building and training activities and, occasionally, to obtain consulting services in order to augment the expertise of the Office in providing technical advisory services requested by governments to enhance their own capacities in developing space policy, legislation or technical expertise.

Other information

6.14 In June 2018, the United Nations Committee on the Peaceful Uses of Outer Space will hold a special segment dedicated to the fiftieth anniversary of the first UNISPACE conference and to building, together with all stakeholders, a new concept of space governance that supports the achievement of the Sustainable Development Goals and would be based on the peaceful exploration and uses of outer space. UNISPACE+50 will consider the effects of the increasing number of available space-based solutions and stakeholders, including emerging spacefaring countries and the private sector, on the conduct of space activities and their impact on local, regional and global markets. UNISPACE+50 will take into account the interdependencies in the space sector and foster international cooperation, paying special attention to the future spacefaring and developing countries while carefully considering the long-term sustainability of outer space activities so that outer space will be accessible to all and that space applications are used to bring concrete benefits to humankind.

6.15 The Office continues to lead the Inter-Agency Meeting on Outer Space Activities (referred to as UN-Space since December 2013, when the General Assembly, in resolution 68/75, recommended that that abbreviation should be used to increase its visibility and to further strengthen its role), which has served as the focal point for inter-agency coordination and cooperation in space-related activities since 1975, with the aim of promoting inter-agency coordination and cooperation and preventing the duplication of efforts related to the use of space applications by the United Nations. In its resolution 69/85, the Assembly urged UN-Space, under the leadership of the Office, to continue to examine how space science and technology and their applications could contribute to implementing the Millennium Declaration and to the post-2015 development agenda process, and

encouraged entities of the United Nations system to participate, as appropriate, in UN-Space coordination efforts. To that effect, the Office continues to work closely with other United Nations entities to prepare the report of the Secretary-General on the coordination of space-related activities within the United Nations system and special reports on selected topics. The latest report of the Secretary-General on the subject covered the period 2016-2017 and addressed meeting the 2030 Agenda for Sustainable Development (see A/AC.105/1115). The special report of UN-Space focused on the role of the United Nations entities in supporting Member States in the implementation of transparency and confidence-building measures in outer space activities (see A/AC.105/1116). As reflected in expected accomplishment (c) of the present report, the programme will continue to increase coherence and synergy in the space-related work of entities of the United Nations system and international space-related entities in using space science and technology and related applications as tools to advance human development and increase overall capacity development.

6.16 The issuance of publications as part of the programme of work has been reviewed, and it is anticipated that recurrent and non-recurrent publications will be issued as summarized in table 6.5 and as distributed in the output information under the programme of work. The Office will continue to publish in electronic format and will limit the publication of printed copies to serve intergovernmental meeting needs. The electronic formats, available on the website of the Office and the UN-SPIDER Knowledge Portal, enable the Office to disseminate related documents, in the respective available languages, in a single format that is both lighter and more cost-effective. In addition to the publications referred to in table 6.5, the Office will produce a number of public outreach materials, such as posters, pamphlets and brochures, to promote the work of the Committee on the Peaceful Uses of Outer Space, UNISPACE+50 and the benefits of using space science and technology and their applications.

Total	**2**	**3**	**4**	**2**	**3**	**7**	**-**	**2**	**8**

6.17 Pursuant to General Assembly resolution 58/269, resources identified for the conduct of monitoring and evaluation for the section would amount to $224,100 (17.5 work-months), representing 16.5 work-months of staff in the Professional category and 1.0 work-months of staff in the General Service category. The responsibilities for mandatory self-assessment are integrated into the existing functions of the staff of the Office. No posts are dedicated solely to monitoring and evaluation. Self-assessment of the Office's activities and periodic thematic assessments would be conducted to cover the main programme responsibilities and deliverables, including the measurement of whether the programme is on track in achieving the results expected as proposed in the context of the logical frameworks approved for 2018-2019.

6.18 Mandatory self-assessments have led to improved management and reporting of programme performance. The Office continues to oversee and coordinate the implementation of its monitoring and self-assessment strategy and action plan through its programme management group, which is chaired by the Director. The Group meets regularly, including on mechanisms to streamline

monitoring and reporting activities and identify actions to be taken as a result of those activities. The Office also makes use of feedback questionnaires and assessments received from stakeholders and beneficiaries of its activities to improve its performance. Through that process, the Office is able to routinely identify areas for improvement, seek mechanisms to overcome practical challenges and, at the same time, develop tools and share ideas on how to improve performance from a substantive and administrative point of view.

Programme of work

Resource requirements (before recosting): $7,161,900

6.19 Substantive responsibility for the programme rests within the Office for Outer Space Affairs. The programme will be implemented in accordance with the strategy detailed under programme 5, Peaceful uses of outer space, of the biennial programme plan for the period 2018-2019.

Table 6.6 **Objectives for the biennium, expected accomplishments, indicators of achievement and performance measures**

Objective of the Organization: To further strengthen international cooperation among Member States and international entities in the conduct of space activities for peaceful purposes and the use of space science and technology and their applications towards achieving internationally agreed sustainable development goals

			Performance measures			
Expected accomplishments of the Secretariat	*Indicators of achievement*		*2018-2019*	*2016-2017*	*2014-2015*	*2012-2013*
(a) Greater understanding, acceptance and implementation by the international community of the legal regime established by the United Nations to govern outer space activities	Increased number of actions taken by States and intergovernmental organizations in order to implement or adhere to the United Nations treaties and principles on outer space and related resolutions, including ratifications and treaty obligation compliance	Target	90	71	52	37
		Estimate		71	64	47
		Actual			64	56
(b) Strengthened capacity of countries, including developing countries and countries with economies in transition, in using space science and technology and related applications, including global navigation satellite systems, particularly in areas related to sustainable development	(i) Increased number of countries, in particular developing countries, receiving training, facilitated by the programme, in space science and technology and related applications	Target	66	62	58	47
		Estimate		62	60	56
		Actual			63	48
	(ii) Increased number of countries, in particular developing countries, receiving support in using space science and technology and related applications	Target	61	59	54	–
		Estimate		59	57	53
		Actual			55	55
(c) Increased coherence and synergy in the space-related work of entities of the United Nations system and of international, intergovernmental and non-governmental entities to advance human development and increase overall capacity development	Increased number of joint activities with United Nations system organizations and international, intergovernmental and non-governmental entities to strengthen capacity and use space science and technology and related applications	Target	48	38	26	–
		Estimate		40	32	26
		Actual			32	26

Expected accomplishments of the Secretariat	*Indicators of achievement*		*Performance measures* 2018-2019	2016-2017	2014-2015	2012-2013
(d) Increased commitment by countries and relevant international and regional organizations in establishing and maintaining ways and means of accessing and developing the capacity to use all types of space-based information to support the full disaster management cycle	(i) Number of actions by countries and relevant international and regional organizations incorporating space-based information in existing or draft disaster risk reduction strategies, disaster management policies or emergency response protocols	Target	32			
		Estimate		24		
		Actual				
	(ii) Increased number of countries, in particular developing countries, requesting and receiving systematic and continuous technical advisory assistance for using space-based solutions in disaster management plans and policies and in the implementation of risk reduction activities	Target	43	42	30	25
		Estimate		42	38	28
		Actual			39	31

External factors

6.20 The programme is expected to achieve its objectives and expected accomplishments on the assumption that:

(a) Member States will be willing and/or able to implement the relevant recommendations, resolutions and decisions and complete the related necessary actions during the biennium;

(b) Stakeholders, in particular those with space capabilities, will continue to make major policy decisions that enable their active participation and/or provision of the resources necessary to promote the use of space science and technology and their applications;

(c) Stakeholders will support the Organization and actively participate in the proceedings of the intergovernmental bodies serviced by the Office;

(d) There will be no major shortfall with regard to human resources and/or the funding of the programme of work that would affect the delivery of services, as projected.

6.21 The objectives and expected accomplishments of the programme are expected to be influenced by the recommendations and decisions of the stakeholders following the convening of UNISPACE+50 in June 2018.

Outputs

6.22 During the biennium 2018-2019, the outputs to be delivered are reflected in table 6.7.

Table 6.7 **Categories of outputs and final outputs**

Outputs	*Quantity*
Servicing of intergovernmental and expert bodies (regular budget)	
General Assembly	
Substantive servicing of meetings:	
1. Fourth Committee meetings on "International cooperation in the peaceful uses of outer space"	6
2. Special meeting on UNISPACE+50	1
3. Joint meeting of First and Fourth Committees on "Security and sustainability of outer space activities"	1
4. Working Group of the Whole of the Fourth Committee	6
Parliamentary documentation	
5. Reports of the Committee on the Peaceful Uses of Outer Space	2
Committee on the Peaceful Uses of Outer Space	
Substantive servicing of meetings:	
6. Plenary	32
Parliamentary documentation:	
7. Report of UN-Space	1
8. Reports of the Legal Subcommittee of the Committee on the Peaceful Uses of Outer Space	2
9. Reports of the Scientific and Technical Subcommittee of the Committee on the Peaceful Uses of Outer Space	2
10. Report on the coordination of outer space activities within the United Nations system	1
11. Special report on the use of space science and technology in the United Nations system	1
12. Reports on the activities by UN-SPIDER	2
13. Other documents: conference room papers, working papers and other background documents	28
Committee on the Peaceful Uses of Outer Space — Scientific and Technical Subcommittee	
Substantive servicing of meetings:	
14. Plenary and working groups	60
15. Meetings of the space mission planning advisory group	4
16. Symposiums on space applications/industry	2
Parliamentary documentation:	
17. Reports on the activities of the United Nations Programme on Space Applications	2
18. Reports on the annual meeting of the International Committee on Global Navigation Satellite Systems	2
19. Reports on the activities of the UN-SPIDER network of regional support offices	2
20. Reports on the technical advisory support and activities carried out in the framework of the work plan of the International Committee on Global Navigation Satellite Systems	2
21. Report on the activities of the space mission planning advisory group	1
22. Other documents: conference room papers, background papers, studies and reports, and reports on workshops, training courses and other activities, among other things	59

Outputs	*Quantity*
Committee on the Peaceful Uses of Outer Space — Legal Subcommittee	
Substantive servicing of meetings:	
23. Plenary and working groups	**40**
24. Symposium on space law with International Institute of Space Law/European Centre for Space Law	**2**
Parliamentary documentation:	
25. Other documents: conference room papers, background papers, legal studies and reports, and reports on activities organized on space law, policy and/or other legal aspects of space activities	**32**
International Committee on Global Navigation Satellite Systems and its Providers' Forum	
Substantive servicing of meetings:	
26. Plenary, working groups and meetings of the Providers' Forum	**20**
27. Working Group of the International Committee on Information Dissemination and Capacity-Building	**8**
Others	
Depository services:	
28. Other services: dissemination of information furnished in accordance with the United Nations Treaties and Principles on Outer Space and maintenance of a public register and database of information furnished in the A/AC.105/INF and ST/SG/SER.E series of documents in accordance with the United Nations Convention on Registration of Objects Launched into Outer Space	**34**
Other substantive activities (regular budget/extrabudgetary)	
Recurrent publications:	
29. Special publication on a thematic area selected annually by UN-Space	**1**
30. Status of the *United Nations Treaties and Principles on Outer Space*	**2**
31. *Messages from Space Explorers to Future Generations*	**2**
32. Other publications: reports on the activities of the programme	**2**
33. Proceedings of the activities of the Office relating to space law	**1**
34. United Nations education curriculum on space sciences, technology and space law	**1**
Non-recurrent publications:	
35. Other publications: special publications on a thematic area of the work of the Office	**3**
Fact-finding missions:	
36. Meetings of intergovernmental organizations and space-related non-governmental entities addressing space-related issues	**10**
Exhibits, guided tours and lectures:	
37. Maintenance of the permanent exhibit on the benefits of space technology for improving life on Earth and for protecting the environment	**1**
38. Other lectures: presentations to Member States, intergovernmental organizations and non-governmental entities on the work of the United Nations in outer space activities	**4**
39. Other exhibits: short-term exhibits showcasing the benefits of space-related activities	**4**
Booklets, fact sheets, wallcharts and information kits:	
40. Other booklets: promotional, educational and information materials on United Nations space activities and the work of the Office	**2**
Press releases and press conferences:	
41. Press releases and press conferences	**15**

Outputs	*Quantity*
Special events:	
42. Other events: celebration of achievements and other anniversaries relating to outer space	1
Technical material:	
43. Maintenance of the website of the Office and of related databases	1
44. Maintenance of the International Committee on Global Navigation Satellite Systems information portal	1
45. Maintenance of the UN-SPIDER Knowledge Portal	1
Humanitarian missions:	
46. Access to space-based information to United Nations organizations, UN-SPIDER regional support offices and national focal points to support their emergency and humanitarian response	1
International cooperation and inter-agency coordination and liaison (regular budget/extrabudgetary)	
Substantive servicing of inter-agency meetings:	
47. Annual open forum for the exchange of information between members of the Committee and representatives of entities of the United Nations system	2
48. Annual session of UN-Space	2
Technical cooperation (regular budget/extrabudgetary)	
Advisory services:	
49. Assistance, upon request, to Member States and regional, intergovernmental and non-governmental organizations to support national and regional actions, programmes and projects relating to space law, space policy and space science and technology and their applications	2
50. Technical assistance, upon request, to Member States for using space-based solutions in disaster management plans and policies and in the implementation of risk reduction activities	6
51. Technical assistance and nominal financial assistance to United Nations-affiliated regional centres for space science and technology education, including their governing boards and advisory committees, to support their education, training and operational activities and the operation of the regional centres	8
Training courses, seminars, workshops and meetings of experts on:	
52. Use of space technology in disaster management at national and regional levels, with support from regional support offices and other entities of the United Nations system.	4
53. Space law, policy and/or other legal aspects of space activities	1
54. Workshops in the areas of the United Nations Programme on Space Applications for participants from developing countries, in particular professional women	11
Fellowships and grants:	
55. Other fellowships: administration of long-term international fellowships in the field of space science and technology offered by Member States and space-related intergovernmental and non-governmental organizations	12
Administrative support services (regular budget)	
Human resources management	
56. Planning, administration and management of the Office's human resources	1
Programme planning, budget and accounts	
57. Planning of the Office's programme and budget, its implementation (long-term and short-term), monitoring its performance and preparing the related documentation	1

6.23 The distribution of resources for the programme of work is reflected in table 6.8.

Table 6.8 **Resource requirements: programme of work**

	Resources (thousands of United States dollars)		*Posts*	
	2016-2017	*2018-2019 (before recosting)*	*2016-2017*	*2018-2019*
Regular budget				
Post	5 828.6	5 828.6	23	23
Non-post	1 394.0	1 333.3	–	–
Subtotal	**7 222.6**	**7 161.9**	**23**	**23**
Extrabudgetary	1 857.9	2 033.9	2	3
Total	**9 080.5**	**9 195.8**	**25**	**26**

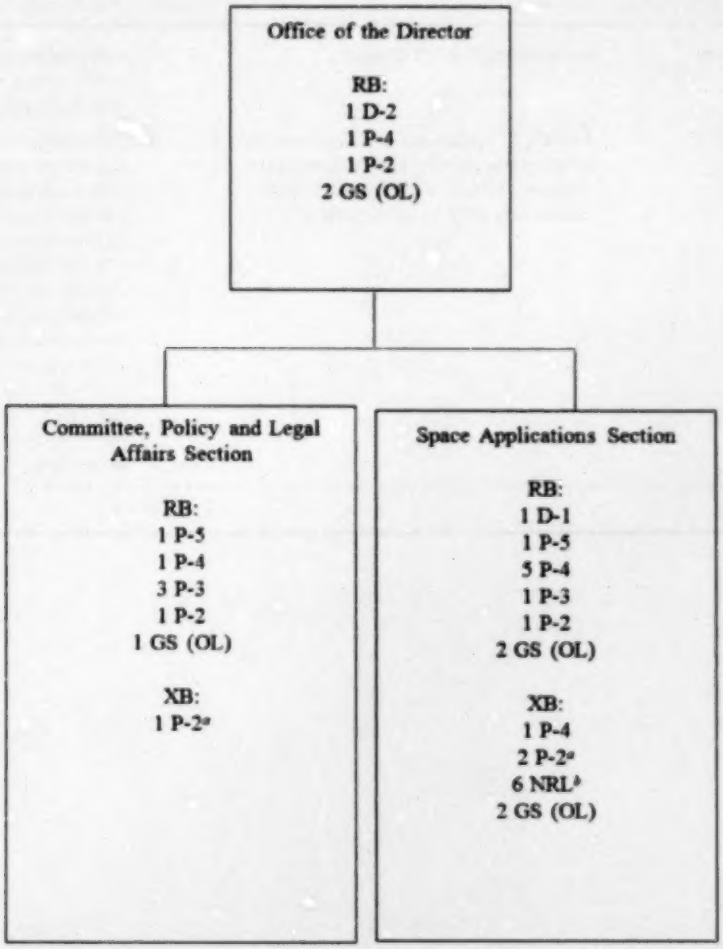
6.24 The overall level of resources for the biennium 2018-2019 amounts to $7,161,900, which would provide for the continuation of 23 posts ($5,828,600) and related non-post resources ($1,333,300) that would allow the Office to continue to implement its mandate, including promoting international cooperation in the peaceful uses of outer space for economic, social and scientific development, in particular for the benefit of developing countries, and servicing the Committee on the Peaceful Uses of Outer Space, its Legal Subcommittee and Scientific and Technical Subcommittee and their subsidiary bodies, the Working Group of the Whole of the Fourth Committee, UN-Space and the International Committee on Global Navigation Satellite Systems.

6.25 The proposed net reduction of $60,700 under non-post items, primarily under grants and contributions, takes into account the anticipated efficiencies that the Office will achieve through better coordination and arrangement for the travel of participants with a view to maintaining the total number of opportunities in 2018-2019 to enhance their capacities in space science and technology applications, space law and policy, including through extrabudgetary resources.

6.26 Estimated extrabudgetary resources in the amount of $2,033,900 would support the programme in the implementation of its mandates as reflected in paragraphs 6.12 and 6.13 of the present report.

Annex I

Organizational structure and post distribution for the biennium 2018-2019



[a] Junior Professional Officers.

[b] Extrabudgetary positions are non-reimbursable loans from the Austrian Research Promotion Agency, the China National Space Administration, the Japan Aerospace Exploration Agency, the German Aerospace Centre and the National Disaster Reduction Centre of China.

Annex II

Outputs included in the biennium 2016-2017 not to be delivered in 2018-2019

A/70/6 (Sect. 6), paragraph	*Output*	*Quantity*	*Reason for discontinuation*
6.19 (a) (ii) b	Annual report of UN-Space	1	Information on the annual sessions of UN-Space will be consolidated with the report of UN-Space
6.19 (a) (iii) b	Reports of workshops, training courses, symposiums, conferences and seminars organized within the framework of the programme of work of the Office	4	Information on the related activities will be incorporated into the reports of the activities of the United Nations Programme on Space Applications, the activities of the UN-SPIDER network of regional support offices and the technical advisory support and activities carried out within the framework of the workplan of the International Committee on Global Navigation Satellite Systems, as well as the publication on the activities of the programme
